Kathmandu, Nepal

A passionate and detail-oriented beginner software developer with a solid foundation in HTML, CSS, JavaScript, and React, now actively transitioning into backend development. Over the past few months, I've dived into backend technologies, gaining hands-on experience with Node.js, Express, REST APIs, MongoDB, and Mongoose to build efficient and scalable server-side solutions. Committed to creating robust systems that support seamless user experiences and meet business goals. Seeking an opportunity in a dynamic organization to apply my technical skills, collaborate with teams, and contribute to innovative projects. Eager to tackle challenges that enhance my expertise and drive continuous growth in the tech industry.

SKILLS

● Figma, HTML, CSS, JS, React, Tailwind, Node.js, Express, REST APIs, MongoDB, Mongoose

PROJECTS

Spotify Clone Music Player Web App

[Github link](#)

Developed a music player web application inspired by Spotify, utilizing the Fetch API to locally track and play music. Implemented features such as playlist creation, and playback controls, enhancing user experience.

To-Do List Application

[Github link](#)

Created a functional to-do list app that allows users to add, edit, and delete tasks. Focused on user-friendly design and local storage for task management.

Password Manager

[Github link](#)

Developed a secure password vault application using React, MongoDB, and Express with elegant UI, featuring credential encryption, clipboard integration, and both cloud and local storage options.

Bookstore Management

[Github link](#)

A full-stack book management system built with React, Node.js, and MySQL featuring responsive design, search functionality, image uploads, and complete CRUD operations.

Website Clones

[Github link](#)

Completed various website clones, replicating popular sites to enhance front-end development skills. Utilized technologies such as HTML, CSS, and JavaScript to achieve responsive and visually appealing designs.
